Cluj-Napoca, România

Junior front-end developer

Cluj-Napoca, România

QA Tester

Gameloft in Cluj-Napoca, România

QA Tester

February, 2018 - May, 2018 | 3 months

ABOUT ME

I am a entry level front-end developer located in Romania in search of both a job and learning opportunities. I speak both Romanian and English fluently and have at least a B2 English level. I am confident with writing HTML, CSS, JavaScript, using Bootstrap and jQuerry libraries. I am also familiar with SEO, DOM, wireframing, working and repairing PC software and hardware components and i am able to build a PC from scratch. My motto is: ""He who has a Why to live for can bear almost any How." – Friedrich Nietzsche.
I also spent some time learning a lot about Psychology during my university years.

SELF-INTERVIEW

How do you continue to educate yourself?

I am constantly finding myself using learning platforms to further expand my knowledge especially in the IT industry. I am currently taking front-end courses and planing to learn back-end afterwards in order to become a full fledged full-stack developer.

What is your definition of success?

Personally i believe that succes revolves around these following principles:
- working everyday with the goal of beeing better than yesterday

- setting concrete and achieveble goals
- understanding the difference between need and want

What do you do to get inspired?

In order to get inspired and motivated i listen to music and follow and investigate people that have greater knowledge that i have.
